
Jolly Joseph

Co-Founder and CTO

Jolly Joseph is the Chief Technology Officer and Co-Founder of AVARA Cyber Solutions LLC. She brings more than 14 years of experience across information technology and cybersecurity, with expertise in security operations, threat detection, incident investigation, vulnerability management, digital forensics, risk assessment, and email and domain security.

Throughout her career, Jolly has supported enterprise and managed security environments using SIEM, EDR, identity and access management, endpoint monitoring, and threat intelligence technologies. Her experience includes investigating security alerts, conducting proactive threat hunts, analyzing indicators of compromise, strengthening endpoint security, and developing incident response playbooks and security procedures.

Jolly also specializes in email and domain protection, including SPF, DKIM, DMARC, and BIMI implementation. Her work helps organizations reduce domain spoofing, phishing, business email compromise, unauthorized email activity, and brand impersonation while improving email authentication and deliverability.

At AVARA, Jolly leads the company's technical strategy and service development. She is committed to translating complex cybersecurity challenges into clear, practical solutions that help small and midsize organizations reduce risk and strengthen their resilience.

Jolly holds multiple industry certifications, including CompTIA Project+, CySA+, Security+, Network+, A+, ITIL 4 Foundation, and (ISC)² Certified in Cybersecurity. She is also pursuing a Bachelor of Science in Cybersecurity and Information Assurance.
